Infrastructure Equity Investments Team
Infranity
Paris, France

RE: Infrastructure Equity Investments Internship (6 months, January 2027)

Dear Hiring Manager,

Taking part in due diligence processes and analysing the accounts of large clients at Bridge Asset Management gave me a first taste of how an investment case is built, and I would like to take that further in infrastructure equity. Infranity's approach speaks to me directly: long-term, resilient assets selected with a high degree of selectivity, financing the energy transition, green mobility, the digital transition and social infrastructure on behalf of institutional investors. Having worked on the finances of a public university and a ministry, I have seen how much public services depend on well-funded infrastructure. Based in Montreuil, I would be glad to join the team in Paris.

Supporting the growth of an equity portfolio starts with sound financial analysis. At Bridge Asset Management in Abidjan, I analysed the statutory and consolidated accounts of large clients, with a focus on cash flows and balance sheets, contributed to due diligence work on shareholding structures and documentation, and wrote summaries of target groups' financial position and performance. I also monitored the performance of investment portfolios worth more than €137M. My MSc in Corporate Financial Management at SKEMA, with courses in corporate valuation, M&A, private equity and financial advisory, is giving me the framework to apply this to deal work.

Modelling and data are where I am most comfortable. At the French Ministry for Europe and Foreign Affairs, I modelled and projected a directorate's multi-year budget trajectories and built automated tools to consolidate its monthly steering data. At Université Paris-Est Créteil, I tracked the budget of a €330M institution, analysed variances, produced the monthly financial reporting and automated Power BI dashboards. My earlier Master's in Financial Markets & Instruments with North Carolina State University covered financial modelling, corporate finance and Python/VBA, and I hold the Bloomberg Market Concepts certification. Native in both French and English, I can work comfortably with a team spread across Paris, London and New York.

I would welcome the chance to bring this rigour in financial analysis and modelling to Infranity's equity investment team. Thank you for your time and consideration; I would be glad to discuss my application in an interview.

Sincerely,

Haile Sotome
